\*\* Additional hardware may be required if more than 29" high.

## IMPORTANT REMINDERS FOR PLASTER CAST MOLDS

1. First, ask yourself... "Do I really need to do a plaster cast when such an easy, accurate alternative is available in Matrix Keen3D?"
2. If the answer is, "No, why would I want to do that?", then please contact us immediately to start using Matrix Keen3D!
3. If the answer is, regrettably, yes, then please indicate any necessary special notes (areas of flexibility, extra rows etc...) on the cast.
4. If hip/shoulder belt slits are needed in the cover, indicate appropriate placement on the plaster cast.
5. Draw a line around the edges of seat and back where you would like the Matrix custom seat and back to end.
6. Draw an arrow indicating the TOP of the cast and write the client's name and company name.
